

RareWear

A Rare Genomics Institute Initiative

The RareWear program is connecting **rare disease patients** with medical device providers offering **free devices** to help the rare disease community

Apply to the program to be matched today!

ABOUT RAREWEAR

The Rare Genomics Institute is excited to launch a new initiative, RG RareWear, to connect rare disease patients to medical device companies. This program aims to give rare disease patients access to the latest available medical devices for free through participating companies to help monitor and manage their condition.

This initiative will be an ongoing program and invites patients to apply throughout the year.

BENEFITS FOR PATIENTS

- Receive access to free medical devices from our partners where possible
- Engage with medical device companies to help better serve your condition
- Manage your condition through non-invasive monitoring devices

RareWear

Program Participants

Target Conditions

The RareWear program is focused on matching rare disease patients with medical device companies for conditions including but not limited to:

Cardiovascular Conditions

Neurological Conditions

Respiratory Conditions

Ophthalmic Conditions

Muscular Conditions

Chronic Conditions

OUR STORY

RG was founded in 2011 for the purpose of providing access to the latest in genetic technology and research to meet the need of rare disease patients. The RG team works directly with families to help find a diagnosis for their loved ones. RG leverages in-house scientific expertise, volunteer advocacy, and mutually beneficial corporate & academic partnership.

If interested, please apply [here](#):

Devices will be provided based on availability and applicability
